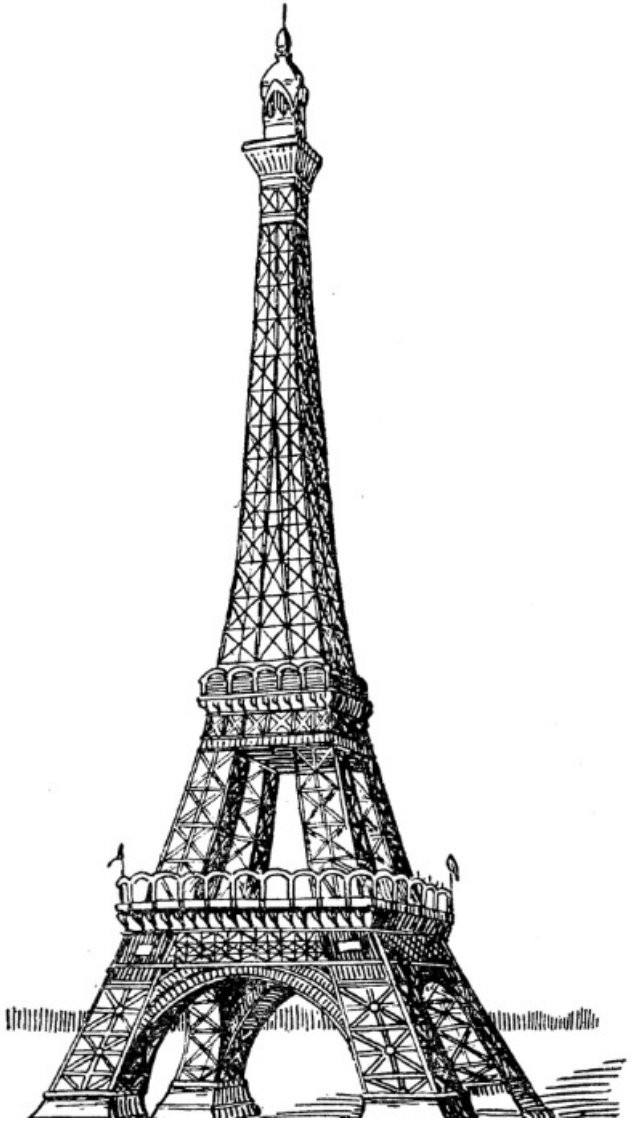
RIOT Summit
September 14 - 15, 2020
WELCOME!

What is RIOT?

- ✓ An operating system for IoT devices too small for Linux
- ✓ A free, open source software ecosystem (tools, libs…)
- ✓ A lively community of developers, grassroots governance

RIOT Summit 2020



The annual meetup for the community around RIOT, and FLOSS + IoT enthusiasts!

- Planned in Paris originally…
- … had to switch to online format (COVID-19 pandemic)

➔ Ad hoc social interaction? Adequate online experience? Fitting best spirit of the RIOT Summit

This Year : A Virtual Venue

- Venue combining Gather.town & WebEx

- We chose to live somewhat dangerously
  - Rather “new” tool Gather.town
  - Live presentations

- In case of issues, please be patient
  - Last resort: use of attendees mailing list
    riot-summit-2020@inria.fr

Program (at a glance)

DAY 1 Morning:

- Tutorial

Afternoon:

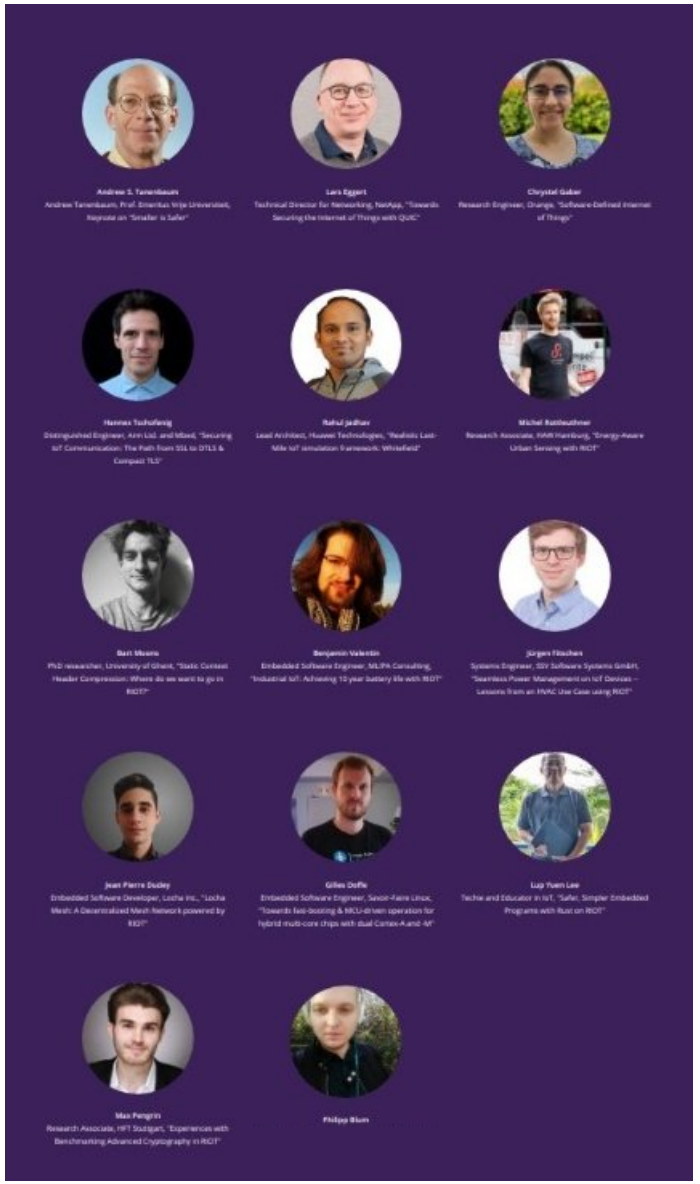
- Keynote: *Smaller is Safer*
- IoT Security Session
- IoT Networking Session

DAY 2 Morning:

- Break-out sessions
- <your input!>

Afternoon:

- Energy-Efficiency Session
- Use-Cases Session



Hang out in hallways!

- Walk in & out of WebEx talks
- Great for side meetings, improvised break-out session
- Bump into people before talks, during breaks
- Open 24/7 over the 2 days
- There's even a poker table ;)
